

Set up Experimental (Demo) field in premise of Agriculture High school in Bojnik

Another experimental demonstration field submitted by municipality Bojnik for establishing an orchard for the Agriculture high school in Bojnik. In this school at the moment there is very little if any practical education on the topic of fruit production. The proposal is to develop an orchard that could be used for this purpose. This facility will be used as a learning resource for both the school students and local farmers. It is also planned that students and local farmers will visit modern orchards and fruit producers in other parts of Serbia.

Total Value: 12,377.01 Euros

MIR2 Contribution: 12,377.01 Euros
